

Fire resistant cables launched

HT Live Correspondent
Chandigarh, June 23

THE KEI Industries Limited, a cable manufacturing company today launched its new range of flame-retardant PVC insulated wires for domestic application, called homecab.

An official release stated that, the range was especially designed for domestic household use.

Homecab, a multi-strand flexible house wires with fire resistant properties are equipped with specially formulated insulation, with a high oxygen and temperature index, which enables the cable to withstand overloads preventing electric mishaps.

The bunched conductors are insulated with specially formulated FR

PVC compound with a high insulation resistance value.

The insulation process is carried out on modern high-speed extrusion lines, which ensures high accuracy and consistency in performance.

Flame retardant properties enable the cable to withstand overloads.

The insulation is resistant to boiling water, steam and vapours.

This prevents ageing and cracking in bathroom kitchens damp walls and chemical industries.

Chairman and Managing Director, KEI Industries Ltd., Anil Gupta, said, "Offering specially designed house wire to a large section of society, Flame retardant Homecab gives security from flames, ageing and cracking of the wires."
