LT Power Cables	110,000	13%	19%	36%	9%	11%	13%

The high growth rate in demand for cables is going to be fueled by the demand from states for R&M of the current installed system and increased usage of cables in place of conductors due to lack of space, control in losses etc.

*All cables above 1.1kV have been considered as HV power cables. The above production data corresponds only to consumption of power cables in the power sector. Also the production is net of export import.
